TRUSTED SECURITY SOLUTIONS

ERS Consultancy are experts in Cyber Security services and ISO management system consultancy and training.

Built on trust

With its origins dating back to 1996, ERS Consultancy exists to supply excellent information, IT security and ISO management services. These are delivered with a human face and an emphasis on best-fit provision. Our aim is to provide a first-rate service for all clients, large or small. We have the flexibility to upscale when required, support you at a moment's notice but most of all we pride ourselves in providing a friendly, approachable and accessible service at all times. We take our relationships seriously and care about your organisation. We like to practice what we preach so we ensure our whole organisation is certificated to ISO/IEC 27001 & 9001.

Ours is not a 'one size fits all approach'

At ERS, we tailor the solution to your needs. So, for instance our ISO certification clients get a bespoke management system. Standards never ask organisations to implement provisions that don't add business benefit. So, at ERS we interpret the requirements of the standard for each individual business. This achieves a cost-effective and timely implementation that adds real value. Our approach helps build a bridge of trust between ERS and its clients.

Furthermore, we ensure our clients have an appropriate understanding of their management system. Too many consultancies leave their clients in the dark as to what they are doing. At ERS we ensure our clients are knowledgeable whenever it's relevant to do so. As a result, our clients can maximise the benefits of their new management system going forward.

	Academy	Security Awareness Training	ISO Foundation	ISO Internal Auditing	Audit Coaching	Onsite or Offsite Training
	Compliance	ISO Audits	Supply Chain Auditing	Cloud/CSA STAR/ISMS/ NIST Audits	GDPR/DPA	SOC 2 and NIS Directive

Our strength is providing big consultancy expertise with small consultancy service levels
 We provide true expertise you can trust in a style you will find refreshing. We have a breadth of knowledge and provide consultancy support across the core ISO standards. This is particularly useful for organisations that want to implement integrated management systems.

Sophisticated solutions:

To address the challenges that arise from the ever changing technology and threat landscapes, we will work with you to find the right security solution for your organisation. Our close association with Government security departments gives us access to privileged information on emerging information security threats that we can utilise in providing solution for our clients.

The ERS difference:

We strive to supply excellence in information and IT security management and across all ISO management systems in a style that builds trust and truly effective processes. In everything we do, our aim is to provide a first-rate service to all clients. We know our success is founded on the quality of the relationship we build with you.

Practicing what we preach

A component of our relationship is practicing what we preach, so ERS's entire operation is certified to ISO/IEC 27001 & 9001. This not only proves our internal information security integrity but gives us insight into our client's perspective on the implementation and audit process.

Flexible costing

A key component of building the relationship is also providing clear value for money. We can offer fixed cost services, or depending on your needs, range of flexible responses including 'light-touch' remote consultancy. We'll always work with you to deliver consultancy at the most appropriate level you need.

The human touch

We also pride ourselves on being friendly, approachable and accessible at all times — not something you can always rely on with other consultants. We are proud that our ability and approach have brought us clients in the public and private sector, in the FTSE 100 as well as other small and medium sized businesses. We also have experience across a range of sectors, including manufacturing, construction, IT, oil and gas, financial services and the charity sector.
