ISO 27001:2022
Transitioning to the new standard

Overview:

ISO 27001 is the internationally recognized standard for information security management systems (ISMS). It provides a comprehensive framework for organizations of all sizes to protect their sensitive information assets from unauthorized access, use, disclosure, disruption, modification, or destruction.

Key changes in ISO /IEC 27001:2022

- Changes in Mandatory clauses 4-10
- New and Consolidated Annexe A Controls
- Structural Changes on the 93 controls

Navigating the Transition from ISO 27001:2013 to ISO 27001:2022:

Organizations that are currently certified to ISO 27001:2013 must transition to the new standard by *October 31, 2025.* The transition process involves a thorough assessment of their current ISMS against the requirements of ISO 27001:2022, identification of any gaps, and implementation of necessary changes.

How ERS Consultancy Can Help?

ERS Consultancy Ltd. is a trusted partner for organizations seeking to transition their ISO 27001:2013 certifications to the latest version, ISO 27002:2022. We offer a tailored approach to help you seamlessly navigate the transition process, ensuring compliance and maintaining your organization's data protection standards.

Benefits of Implementing ISO 27001

- Enhanced information security posture
- Reduced risk of data breaches
- Improved compliance with data protection regulations
- Improved business continuity
- Boosted employee morale and trust

Why Choose ERS?

Cyber Security, ISO management system consultancy and ISO training

Experts in Cyber Security and ISO management - We are an Information Security firm offering a diverse portfolio of services including consulting, training and certification, ISO/framework implementation, penetration testing and risk management. The ERS consultancy team has been working with Information Security Standards for a range of customers since 1997 and are experienced in managing full implementation and certification of Information Security Standards for clients.

Established by experienced security professionals, we are independent of IT vendors and their products, bringing the benefit of impartiality and allowing us to enable clients with the appropriate tools and knowledge necessary to secure their systems.

ERS will work closely as a team with the client, involving them at all stages of the project, to ensure the transfer of both knowledge and skills and thus empowering the organisation.
ERS designates consultants with specific knowledge to the organisation.

All our consultants are professionally qualified in security management or hold IT Security certifications.

Our consultants have years of experience in security and compliance in various industries.

In ERS we believe in practicing what we preach - ERS itself holds the ISO 27001 accreditation and the Cyber Essentials certificate.
