

Penetration Testing

In the evolving cyber security landscape, the organizations are constantly striving to protect their data and systems from evolving threats. ERS recognizes the importance of comprehensive and effective penetration testing to identify and remediate vulnerabilities before they can be exploited.

Our Security Testing Services are designed to help organizations of all sizes achieve robust cyber security posture.

Trigger points for the Penetration Testing:

- Significant changes to the company Infrastructure, Network or Systems
- Preparing for compliance with the Security Standards
- Launching new IT products and services
- Changes in the Threat Landscape

How ERS Consultancy can help?

ERS Consultancy is a leading provider of penetration testing services, specializing in helping organizations identify and address vulnerabilities in their systems and applications. Our team of highly skilled security experts will conduct a thorough assessment of your environment, simulating real-world attacks to identify and remediate vulnerabilities before they can be exploited by malicious actors.

Why Choose ERS?

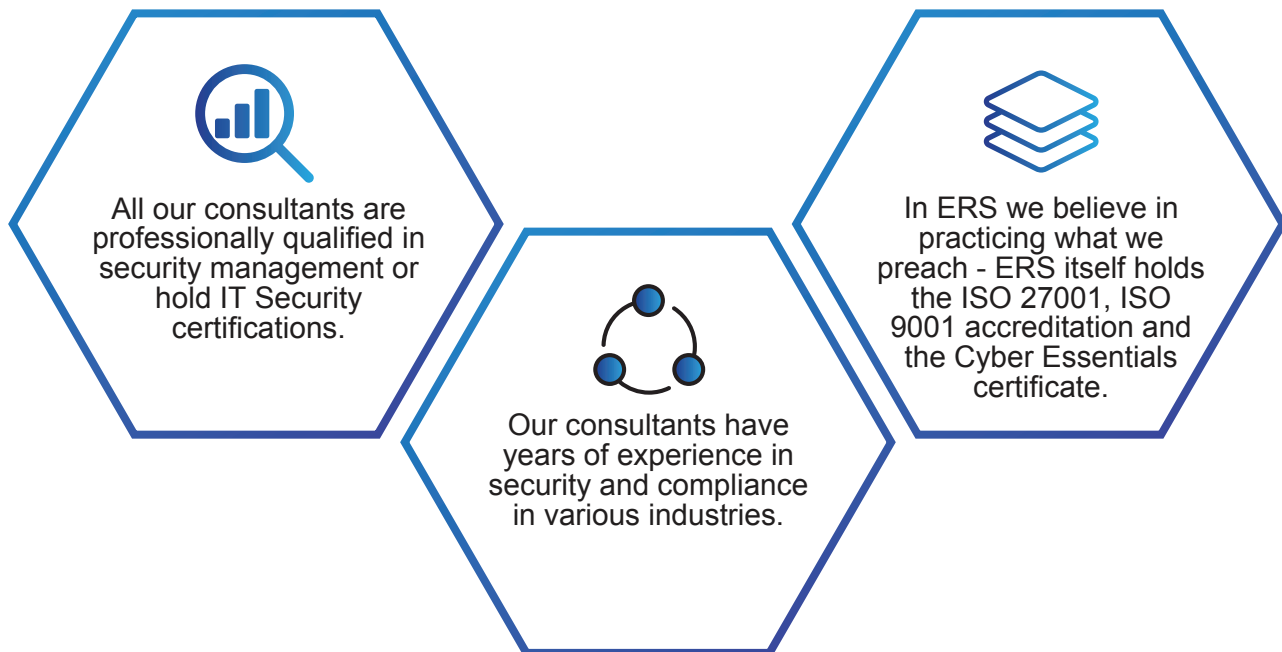

Cyber Security, ISO management system, SOC 2 consultancy and ISO training

Experts in Cyber Security, SOC 2 and ISO management - We are an Information Security firm offering a diverse portfolio of services including consulting, training and certification, ISO/framework implementation, penetration testing and risk management. The ERS consultancy team has been working with Information Security Standards for a range of customers since 1997 and are experienced in managing full implementation and certification of Information Security Standards for clients.

Established by experienced security professionals, we are independent of IT vendors and their products, bringing the benefit of impartiality and allowing us to enable clients with the appropriate tools and knowledge necessary to secure their systems.

ERS will work closely as a team with the client, involving them at all stages of the project, to ensure the transfer of both knowledge and skills and thus empowering the organisation. ERS designates consultants with specific knowledge to the organisation.
